

For our growing technology start-up in Heidelberg's Bahnstadt we are looking for a

## **Technician (m/f/d) for 15 to 30 hours/week**

At the earliest possible date.

### **These are your duties:**

As a technician, you are responsible for the test set-ups and feasibility studies of our vision systems. You take care of both the mechanical and electrical components of these customer projects. You also work on the technical implementation of new products (e.g. the development of our own sample projector in Machine Vision). Finally, you install our object handling systems at our customers' sites and set them up ready for operation.

### **This is your profile:**

- Results-oriented, self-organized way of working with a strong willingness to improve and a forward-looking mindset;
- Two to five years of practical experience, preferably in optoelectronics;
- Ideally knowledge of CAD design;
- Whether English or German: you can communicate without any problems;
- Enjoy working in a young and dynamic company.

### **That's what we do:**

HD Vision Systems supports manufacturing companies in all aspects of Machine Vision using light field technology and deep learning. Thus, we offer a quick and easy access to Robot Vision. Whether 3D scanning, quality inspection or handling of workpieces: our focus on user-friendliness is based on our unique combination of hardware and software as core of our light field and AI based products. This enables our partners to automate flexibly, quickly and easily according to their needs.

### **Sounds like you?**

Then send us your application or get in touch with us now:
