

For our growing technology start-up in Heidelberg's Bahnstadt we are looking for a

## **Compulsory intern, graduate student (m/f/d) in marketing**

At the earliest possible date.

### **These are your duties:**

As an intern you will support our communication and marketing with all upcoming campaigns and events. The focus lies on brand creation and awareness in our B2B target group. This includes, for example, the development of a technical text and the corresponding seeding via social media, PR and email marketing.

If you write your thesis with us, you will also be involved in communication and marketing. In addition, you will work on the topic of your thesis in our strategic corporate context. You can discuss concrete proposals directly with us - otherwise we will develop a topic together based on our corporate needs.

### **This is your profile:**

- Results-oriented, self-organized way of working with a strong willingness to improve and a forward-looking mindset;
- Enrolled student in a relevant field;
- 3 to 6 months' time;
- You Enjoy working on a challenging technology topic in B2B;
- Ideally, you have first experience in B2B marketing as well as knowledge of copywriting, WordPress, SEO and/or image editing.

### **That's what we do:**

HD Vision Systems develops products and solutions for Machine Vision using light field technology and Deep Learning for manufacturing companies in every industry. In this way, we offer fast and easy access to robot vision. Whether 3D scanning, quality inspection or workpiece handling: our focus on user-friendliness builds on our unique combination of hardware and software. This enables our partners to automate flexibly, quickly and easily according to their needs.

### **Sounds like you?**

Then send us your application or get in touch with us now:
