

For our growing technology company in Heidelberg's Bahnstadt we are looking for a

### **Compulsory intern, graduate student (m/f/d) in product development**

at the earliest possible date.

#### **These are your duties:**

As an intern, you will support our product development. Following instructions, you will independently carry out test recordings for our customer projects and actively work on the development of new test setups for our 3D measurements. You will also be integrated into the benchmarking processes of our object handling solution.

If you write your thesis with us, you will also be involved in product development. In addition, you will work on the topic of your thesis in our strategic corporate context. Feel free to present your topic suggestions to us.

#### **This is your profile:**

- Results-oriented, self-organized way of working with a strong willingness to improve and a forward-looking mindset;
- Enrolled student in a relevant field (physics, engineering, mechanical engineering) or a suitable personal profile;
- 3 to 6 months' time;
- Technical understanding and ideally initial experience in the areas of Machine Vision and robotic systems;
- No matter whether English or German: you can communicate without any problems.

#### **That's what we do:**

HD Vision Systems supports manufacturing companies in all aspects of Machine Vision using light field technology and deep learning. Thus, we offer a quick and easy access to Robot Vision. Whether 3D scanning, quality inspection or handling of workpieces: our focus on user-friendliness is based on our unique combination of hardware and software as core of our light field and AI based products. This enables our partners to automate flexibly, quickly and easily according to their needs.

#### **Sounds like you?**

Then send us your application or get in touch with us now:
