

For our growing technology company in Heidelberg's Bahnstadt we are looking for a

Technician (Part-time possible, m/f/d)

at the earliest possible date.

As a technician, you will support our product development and production by performing incoming inspections and documenting the processing and status of the processes. Following instructions, you will independently perform test recordings for our customer projects and actively participate in the development of new test setups for our 3D measurements. Finally, you will install and commission our object handling systems at our customers' sites.

This is your profile:

- You are results-oriented and self-organized. You want to continuously develop yourself and have a future-oriented mindset;
- Technical understanding and ideally initial experience in the areas of image processing and robot systems;
- You have a technical education or degree; career changers are also welcome;
- Quick to learn and focused on solving problems;
- You can communicate easily in English or German;
- Enjoying working in a young and dynamic company.

That's what we do:

HD Vision Systems develops products and solutions for Machine Vision using light field technology and Deep Learning for manufacturing companies in every industry. In this way, we offer fast and easy access to robot vision. Whether 3D scanning, quality inspection or workpiece handling: our focus on user-friendliness builds on our unique combination of hardware and software. This enables our partners to automate flexibly, quickly, and easily according to their needs.

Sounds like you?

Then send us your application or get in touch with us now:
